

# WIRELESS NETWORKS

As the mobile industry continues to explode, growing at multiples faster than any other technology, FARR Technologies is ready to assist you with your deployments. FARR Technologies is the industry leader in the deployment of 4G Wireless Networks. Whether you need to install a local E-Node B or you want to build your own Super Node, FARR Technologies has done it. With FARR Technologies you are not living on the bleeding edge but deploying networks with proven expertise.
